Innovative Rail Anchoring Tool

Success Story with NY Rail System

Proven in the Field... Kiewit, NY
 Railroad Anker System

IBIX Tungsten Carbide Tip for hole sizes:
Diameter: 3" – 5" Depth: Maximum 3'
(Adjustable Lance for Custom Depth Specifications)

90° Angle for Even Profiling
 15 Second Per Hole Operation
 (with Garnet Media)
 Doubles Epoxy's Strength
 Capability
 Deflector Vacuum Available

**IBIX Custom 90°
 Blast Nozzle I-76127**

Patent Pending

Portable Micro-Abrasion Systems

Transportation Restoration

Planes...Trains...Automobiles

Non-Destructive Precision Blasting

IBIX® lightweight, portable aluminum units incorporate a low pressure micro-air abrasion system. Perfect for restoring all kinds of transportation vehicles; from historic airplanes or trains to tractors, cars and motorcycles. Powerful enough for professional restoration experts, with the ease of operation for any enthusiast. IBIX units are powerful enough to remove paint and rust from virtually any surface without damaging the original material.

Portable, Economical, Versatile and Safe

Our units can be safely operated by one person. They are equipped with rollers for easy maneuverability. IBIX is user friendly and delivers a precise, consistent even air and media flow for a smooth surface finish with very low air volume requirements. Minimal dusting provides a safer operation for the operator and the environment.

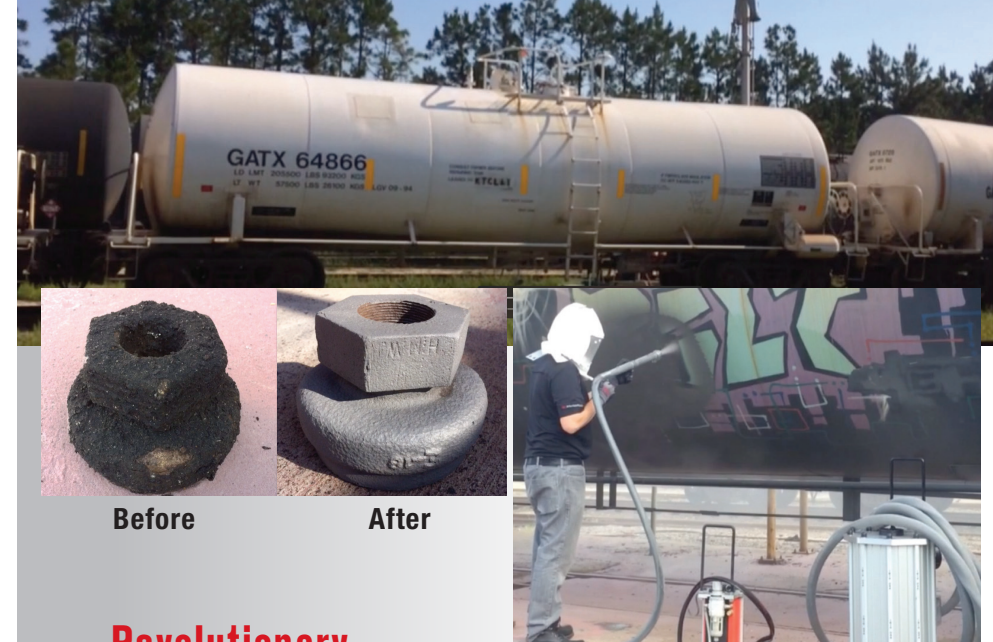

IBIX North America is a Proud Sponsor for

Supporting the Preservation of Historical Aircraft

Our EASY BLAST system will be on display at air shows across the Nation along with the only restored Flying Fairey Gannet.

The IBIX Easy Blast will be used on the Wings of Steel's next historic restoration project. A rare jet fighter that served throughout the 70's will take 3 years to complete.

Before

After

Revolutionary Rotational Technology... Soft Abrasion HELIX Patented Gun

The patented HELIX® Gun uses a gentle, helical rotational movement. This soft sanding motion is effective for removing paint, rust, grease and oil without damage to even delicate surfaces.

Extended Lance

An invaluable tool offering an additional 3 ft. of reach for high and small spaces such as attics, high ceiling and crawl spaces. Operators can cover more area in less time.

Abrasive Media

IBIX carries a complete line of the highest quality green abrasive media. 200 Mesh Garnet is our recommendation for most restoration projects. We also supply Soda, Walnut Shell, Calcium, Crushed Glass and Corn Cob.

Optional Equipment Available for IBIX Units

HELIX®
Rotational Gun
Fits All Units

Quick Click System available for Retrofitting Standard Systems with New Helix Gun

Extended Lance
Available for all units.
Perfect for Overhead Work and Tight Spaces

Dust Reduction
Vacuum Shroud Attachment Available

Additional Nozzle Kits
Available for Purchase with all IBIX Units

We are committed to protecting the environment for the next generation
